IWILLMEDIA CRM — Visual Workflow Guide

Simple, Plain-English Operating Guide for Staff (Users) & Administrators

Standard Operating Procedure

1. System Overview: The Two Core Roles

The CRM separates everyday execution from managerial oversight so everyone stays focused and efficient.

Staff Role (The User / Doer)

TEAM MEMBER

Primary Mission: Complete daily deliverables, clock accurate session timers, handle blockers, and contact assigned leads.

- **Work Deliverables:** Receives work assignments with an instant audio chime alert. Starts and stops personal timer.
- **Holds / Blockers:** Can mark tasks "Pending" if waiting for client assets, logos, or approvals.
- **Leads Follow-Up:** Sees assigned leads and clicks WhatsApp to chat directly with prospective clients.
- **Protected View:** Financial records, billing invoices, and rates are hidden to ensure privacy.

Admin Role (The Manager / Overseer)

MANAGEMENT

Primary Mission: Manage clients, assign work items to team members, monitor live timers in real-time, and manage billing retainers.

- **Master Control:** Create clients, assign deliverables to team members, update priorities, and set deadlines.
- **Live Oversight:** Sees a real-time banner of who is working right now with ticking stopwatches.
- **Billing Management:** Creates monthly retainers and manages invoices across INR (₹), AED (د.إ), and USD ($).
- **Safety & Authority:** Exclusively deletes work items, creates staff accounts, and views financial reports.

COMPLETE END-TO-END BUSINESS JOURNEY (NORMAL-MAN VIEW)

1 Lead Comes In
Prospect fills Meta Ads form or website link. Lead auto-routes to a staff member.

→

2 Follow-up & Won
Staff chats via WhatsApp. When status is set to **"Won"**, CRM auto-creates a Client!

→

3 Work Assigned
Admin assigns task. Staff hears a chime. Task appears on staff workload card.

4 Live Work Timer
Staff clicks **"Start Timer"**. Clock ticks live. Admin sees live green indicator.

→

5 Delivery & Done
Staff finishes project and clicks **"Complete"**. Time is logged forever into project history.

→

6 Billing & Invoice
Billable tasks auto-create invoices. Recurring monthly retainers generate automatically!

The 3 Key Buttons for Staff Members

Staff only need to know 3 buttons: **Start Timer** when starting work, **Mark Pending** if blocked by client feedback, and **Complete** when the deliverable is finished. The CRM handles notifications, timesheets, and invoices automatically.

Workflow 1: Sales Leads to Active Clients

How new inquiries turn into paying clients without manual copy-pasting

SALES & MANAGEMENT WORKFLOW

2. The Lead-to-Client Journey (Step-by-Step)

Automated pipeline that captures ads inquiries and eliminates lost leads.

1 Lead Capture via Meta Instant Form or Direct Link

AUTOMATED / ADMIN

- Prospects click your Instagram/Facebook Ad and submit the instant form. Or, admin manually adds a lead in `/leads`.
- Lead instantly records Name, Phone, Email, Campaign Details, and custom question responses.

2 Automatic Staff Routing & Notification

STAFF NOTIFICATION

- The form link automatically assigns incoming leads to the specific staff member chosen during form setup.
- Staff receives an alert and sees the prospect immediately on their Leads screen.

3 One-Click WhatsApp Follow-Up

STAFF ACTION

- Staff clicks the green **WhatsApp** button on the lead row — opening a pre-filled WhatsApp conversation.
- Staff updates the lead status: `New` ➔ `Follow-up` ➔ `Interested`, and logs meeting remarks.

4 Deal Closed ➔ Auto-Creation of Client Company!

AUTOMATED MAGIC

- As soon as the lead status is updated to **"Won"**, the CRM automatically creates a new Client company in `/clients`!
- No manual data entry: the client name, phone number, and contact info are created instantly so work can be assigned!

📊 VISUAL LEAD STAGES & WHAT THEY MEAN

📱 Meta Instant Lead Form Features

- Native Meta Blue design with mobile-optimized layout.
- Custom questions (dropdowns, text fields, checkboxes).
- WhatsApp business quick-connect on completion screen.
- Zero manual CSV exports: leads flow straight into CRM.

🏢 360° Client Profile Overview

Once converted, the Client profile drawer shows:

- Every historical task assigned to any staff member.
- Active monthly retainer contracts.
- Full invoice ledger (Paid, Pending, Overdue).

Workflow 2: Staff Work & Live Timer Tracking

Daily task execution, live stopwatches, blocker holds, and completion

DAILY OPERATIONS

3. Daily Work Deliverables Cycle

Designed for clear accountability: staff always know what to work on, when it's due, and time spent.

Step A: Admin Assigns Work

Admin opens `/work` and clicks "Assign Work":

- Selects Client & Deliverable Title (e.g. "*Brand Video Reel*").
- Assigns to designated Staff Member.
- Sets Due Date and Priority (Low, Normal, High, Urgent).
- Optional: Enters Billable Amount (masked from staff).

Step B: Staff Hears Audio Alert

Staff receives immediate real-time alert:

- A pleasant audio chime plays through computer speakers.
- A notification toast displays the new assignment.
- Task appears inside the staff member's workload card under **"Active"**.

⏱ THE 4 WORK ITEM STATUSES

1. Assigned
Waiting in queue to be started.
Action: "Start Timer"

2. In Progress
Staff is actively working. Live ticker runs.
Action: Work on project

3. Pending (Hold)
Paused due to blocker or client delay.
Action: "Resume Work"

4. Completed
Milestone finished and delivered.
Action: Auto-generates bill

How Timers and Blockers Work

🟢 Starting the Timer

• Click **"Start Timer"** on any task.
• Top navigation bar turns purple with a pulsing green dot tracking `01:24:35`.
• Starting a new timer automatically stops any previous active timer (prevents double billing).

⚠️ Blocker / Hold Reason

• If waiting for client approval, click **"Mark Pending"**.
• Type the hold reason (e.g. "*Waiting for client logo asset*") and expected resume date.
• Keeps everyone aligned so deadlines can be adjusted.

✅ Completing the Task

• When deliverable is done, click **"Complete"**.
• Total accumulated time is permanently recorded.
• If the deliverable is billable, an invoice is automatically placed into `/billing` for admin approval!

📋 **Workload Section Filters (All • Active • On going • Pending • Done)**
Staff cards load 5 deliverables at a time with a **"Load More"** button for clean page loading. Staff can filter deliverables instantly using the top filter buttons.

Workflow 3 & 4: Billing & Admin Control Room

Recurring retainers, invoice lifecycle, and real-time team oversight

ADMIN & FINANCE FOCUS

4. Billing, Retainers & Calendar Overview

Cashflow tracking supporting INR (₹), AED (د.إ), and USD ($).

🔄 Monthly Retainer Contracts

Set up once, auto-generates forever:

• In `/billing` under Retainers, create a template (e.g. *"Monthly Digital Marketing — ₹30,000 due 5th of every month"*).

• The CRM automatically generates the individual monthly occurrence bills on schedule without disturbing the master contract!

📅 Visual Monthly Billing Calendar

Color-coded day-by-day cashflow:

• Open `/calendar` to see all bills mapped onto calendar days.

• 🟢 **Emerald** = Paid Invoices

• 🟡 **Amber** = Pending Invoices

• 🔴 **Rose** = Overdue Invoices

5. Admin Control Room: Live Team Timers & Safety

🛡️ Real-Time Team Activity Tracking (Zero API Cost)

Admins have complete live visibility across the agency through 3 integrated views:

1. Top Live Activity Bar

At top of `/work`, see clickable chips of every clocked-in staff with live elapsed timers.

2. Staff Card Badges

Card header pulses green: 🟢 `Working: Aswin Video (01:24:12)` with glowing row borders.

3. Dashboard Widget

Directly on `/dashboard`, lists active team sessions, client names, and elapsed duration.

6. Permission Matrix: Who Can Do What?

ACTION / FEATURE	STAFF (USER)	ADMINISTRATOR	EXPLANATION
Start / Stop Personal Timer	YES	YES	Staff control their own active sessions
Stop Another Staff's Timer	NO	NO	Guarded so only the assigned staff member can stop their timer
See Live Working Staff Tickers	NO	YES	Admins see live activity across all staff members
View Task Remarks & Due Dates	YES	YES	Click "View Task" popup on any deliverable
View Billable / Billing Amounts	MASKED	VISIBLE	Financial confidentiality strictly enforced
Edit / Reassign Deliverables	NO	YES	Only Admins can change assignments and due dates
Delete Work Deliverables	NO	YES	Admin-only action with confirmation & safe cascade cleanup
Create Staff Accounts	NO	YES	Created instantly via admin staff provisioning
Mark Invoices as Paid	NO	YES	One-click payment reconciliation in Billing ledger
